Solar System Proposal

Dear Sir,

Advanced Solar and Energy Solutions is one of New Jersey's lead educator in energy efficiencies and renewal energy. We also are the founder of the Energy Show which can be heard every Saturday afternoon on 770AM between 3pm to 4pm. We are heard on many Radio Shows across the state and do seminars throughout the state.

We have been working with the team at Forst Contracting & Development Corporation to develop the addition of the split use project at 391 Springfield Ave, Berkeley Heights, NJ 07922.

It will be one of New Jersey's first totally Energy Efficient complex, designed, and engineered with the most efficient heating, cooling, insulation methods combined with renewal energy which eliminate the use of fossil and will create positive benefit for the tenants, the town, and most of all the environment.

Our team of experts have designed multiple systems that will be installed on the flat roof. The panels and racking will not exceed 20 inches off the roof and cannot be seen to the public. The parapet far exceeds the height of our panels.

Ron Urban the CEO of Advanced Solar and Energy Solutions is one of the lead experts in the field and he also have to testify in many planning boards throughout the state.

See actual pictures of the system we propose to use. Please feel free to contact Ron Urban at 732-496-0804 to answer any and all questions.

Regards.

Ron Urban

CEO
